for an adult, child and infant? We have the opportunity to have a class here at BPC.

"**Heartsaver® CPR AED** is a video-based, instructor-led course that teaches adult and child CPR and AED use, infant CPR, and how to relieve choking in adults, children, and infants. This course teaches skills with the AHA's research-proven practice-while-watching technique, which allows instructors to observe the students, provide feedback, and guide the students' learning of skills.

This course is for anyone with limited or no medical training who needs a course completion card in CPR and AED use to meet job, regulatory, or other requirements.

### **Features**

Video-based course ensures consistency

Instructor-led, hands-on class format reinforces skills proficiency

Course is updated with the new science from the *2015 AHA Guidelines Update for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care*"
